

Implications of US government surveillance on Privacy and Human rights

Technology/Topic Selection

- Government collects huge amounts of data to examine.
- Government utilises this data to prevent crime.
- Possible implications on human rights and privacy.

Opportunities

- Protect from terrorism or any form of terrorist attack that could happen.
- Contact tracing, reducing the risks of diseases being spread.
 - Preventing crime, finding criminals quickly and through data that can cause harm.

- Mishandling of data can result in data leaks of private information
- Racial Profiling of individuals.
- Surveillance effectiveness.
- Loss of control on your information.

Choices

- Opportunities outweigh the risks
- Just need to make sure that the surveillance is in the right hands
- It's better to protect the safety of the country as a whole rather than having everyone to fend for themselves.

Roles and Responsibilities

-caleb is typing...

I am doing: topic selection, risks, references, lead researcher

javeria is typing...

I am doing: opportunities, choices, roles and responsibilities, ui design
